Full Stack Developer

Full Stack Developer with 2+ years building and modernizing production web platforms, including a business-critical booking system processing 200–300 daily transactions across 45 active routes. Core stack: **Vue, Nuxt, Laravel, Ruby on Rails, MySQL, TypeScript**, with working experience in **React, Python, PostgreSQL, Docker, Twilio**. Focused on end-to-end feature ownership, from database and API design through front-end implementation, including role-based access control, payment workflows, and admin tooling for high-traffic customer-facing systems.

WORK EXPERIENCE

Bravenet Web Services

05/2024 - Present

Full Stack Developer

Parksville, BC

- **Architected** and rebuilt core modules of IslandLinkBus, a production transportation booking platform, using **Nuxt 4, Vue 3, Laravel 12, MySQL, Docker, and Twilio**, supporting **200–300 daily bookings across 45 active bus routes** with automated SMS confirmations, reminders, and broadcast messaging
- **Engineered** a 6-tier role-based access control system (sysop, admin, office admin, driver, sprinter, member) in **Laravel/MySQL**, each with distinct CRUD-level permissions, alongside ghost-login functionality for secure admin impersonation
- **Automated** daily backend workflows in **Laravel**, including a cron job that aggregates per-route operational metrics (distance, passenger volume, cost-per-km) into a route history table, and a manifest system distributing personalized driver schedules and consolidated admin reporting across **9 report types**
- **Developed** and maintained reusable front-end components (animations, carousels, calendar tools, tile navigation, breadcrumbs) for Bravenet's SiteBlock website builder using **Ruby on Rails**, resolving **18 bugs and shipping 8 new features and 9 enhancements** across 35 closed tickets
- **Implemented** a tiered rewards system (iPoints) in **Laravel/MySQL** supporting **3 payment paths** (full iPoints, full cash, or split payment), with reward accrual logic calculated dynamically from route legs and passenger count, plus standalone iPoints purchasing

Vancouver Island University

09/2023 - 12/2023

Software Developer Internship

Nanaimo, British Columbia, Canada

- **Built** a student registration and dynamic scheduling web application for the VIU CREATE event using **MySQL and Python**, automating topic-based presentation slot assignment and streamlining data migration from XLS to CSV

Natural Resources Canada | Ressources naturelles Canada

05/2023 - 08/2023

Software Developer Internship

Nanaimo, British Columbia, Canada

- **Developed** a mobile application to replace the government's legacy "Hot2K" tool, digitizing home energy-audit data and photo collection for green energy retrofit assessments

EDUCATION

Diploma in ITAS Web and Mobile Development

01/2022 - 12/2024

Vancouver Island University

AWARDS & SCHOLARSHIPS

Guest Speaker at Vancouver Island University – 2025 and 2026

Vancouver Island University

Dean's Honour List 2022/2023 and 2023/2024

Vancouver Island University

SKILLS

- **Languages:** JavaScript, PHP, Python, Ruby, HTML, CSS
- **Frameworks:** Vue, Nuxt, React, Laravel, Ruby on Rails
- **Databases:** MySQL, MariaDB, PostgreSQL, Relational Databases
- **Tools:** Docker, Git, REST APIs
- **Concepts:** Code Review, Data Structures & Algorithms, REST API Design, Automated Testing
